TITLE:

DTEB 858.R.004010 FREIGHT BILL OF LADING INFORMATION VERSION 1

ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Delete

Description:

Delete Type of Service Code 'DR- Door to Ramp' from L012 (Index 176-12).

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

None of the 3 shipper systems have implemented the DM that added this code.

Door-to-Airport (the service that the 'DR' code was intended to represent) is not listed as an allowable option in the Military Freight Traffic Unified Rules Publication (MFTURP-1). Without it being an allowable code, carriers cannot submit tenders with that type of service. HQ AMC/A4TT was approached about adding this Type of Service to MFTURP-1 and they expressed hesitation to add it to the rules pub since most everyone uses door-to-door service these days. HQ Air Force and HQ USMC both indicated they no longer see a need for this code in the 858R.
