USE THIS FORM TO REQUEST A NEW OR A CHANGE TO AN EXISTING DoD EDI CONVENTION OR ASC X12 STANDARD.

Complete all required actions. Numbered attachments may be used for continuation.

ITEM 2: REFERENCES

Identify either the DoD EDI convention or ASC X12 standard requiring change. If a new convention or standard is required, type "NEW" in place of the title.

Type

DoD EDI (C)onvention

TITLE:

DTEB 300.A.004010 RESERVATION
(BOOKING) (OCEAN) VERSION 5

ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Change

Description:

Section 3.0 Segment H3 Max Use from 6 to 20.

Section 4.0 Index 15 Segment H3, ADD under DoD Recommended attributes Max Use 20.

Add segment usage note that reads: "This segment contains syntax that is not compliant with this version of the ASC X12 standard. X12 data maintenance has been submitted requesting updates to match the DTEB implementation. Once approved this transaction set will be upgraded to the version of the ASC X12 standard that supports the functional requirements."

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

Functionally, there is a requirement to order more than 6 accessorials per booking in support of SDDC Contracts with carriers. The EDI 300A is the contract between SDDC and the carriers and it is expected for it to include all accessorial codes representing the special services the carrier will provide in exchange for a fee. The current X12 standard allows only 6 instances of the H3. We are requesting that a waiver be granted to allow for implementation outside of the X12 guidelines while we secure approval from the X12 committee and the new specifications are approved and implemented within IBS and its partners.

Identify priority and required date of change.
