## ITEM 3: PROPOSED WORK

For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

--- -- L108 150 Special Charge or Allowance Code C ID 3/3  
--- -- L112 276 Special Charge Description C AN 2/25

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

Functionally, there is a requirement to notify the carrier of the rate for the services being booked in support of SDDC Contracts with carriers. The EDI 300A is the contract between SDDC and the carriers, and it is expected to include the authorized fee for the services being ordered at the time of booking. The current X12 standards allow only 1 instance of the L1. We request a waiver be granted to allow for implementation outside of the X12 guidelines while we work to secure approval from the X12 committee.

Identify priority and required date of change.
