For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Add

Description:

At index 2-03 in the B403 DE 157 Shipment Status Code in Sections 3 & 6, add the following usage note for the code value 'EC':

USAGE: This code should be used when the Contractor has regained possession of its asset prior to arrival of the cargo at the delivery location. For example, when cargo is deconsolidated at a transship point, the container is returned to the Contractor prior to cargo delivery, and the cargo is moved as pallet loads to the final consignee. Each container shipment container return event should be documented with either an RD or an EC but never both.

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

Usage to clarify the operational requirements as directed by the USC-08 contract and as requested by the DTEB Committee at their 21 Jul 15 meeting.
