

PART 1		
DTEB DATA MAINTENANCE WORK REQUEST FORM		
DATE SUBMITTED: 09/22/2010	DM NUMBER (to be completed by LMI) 912	
USE THIS FORM TO REQUEST A NEW OR A CHANGE TO AN EXISTING DoD EDI CONVENTION OR ASC X12 STANDARD . Complete all required actions. Numbered attachments may be used for continuation.		
ITEM 1: SUBMITTER INFORMATION		
List information identifying the submitter of the proposed change.		
POINT OF CONTACT	ORGANIZATION	APPLICATION SYSTEM AFFECTED
Gore, Harry	LMI	Carrier's Information System, IBS
ADDRESS	PHONE (DSN)	
USTRANSCOM/J6-AD Enterprise Data Office	779-4660	
508 Scott Drive	PHONE (COMMERCIAL)	
Scott AFB, IL 62225-5357	(618) 229-4660	
	PHONE (FAX)	
	(618) 229-1928	
ITEM 2: REFERENCES		
Identify either the DoD EDI convention or ASC X12 standard requiring change. If a new convention or standard is required, type "NEW" in place of the title.		
DoD EDI (C)ONVENTION	Convention or Standard Title:	
	300A-Reservation (Booking) (Ocean)	
	Version:	
	4010	
ITEM 3: PROPOSED WORK		
Identify the action required (add, change, delete) and describe the specific work requested to the convention or standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.		
ACTION: Add	Description	
	Add conditional N903 data element at index 7-03, Transportation Tracking Number (TTN)," with attributes C AN 17/17. Add user note "When this N9 segment refers to a TCN (N901="TG') and TTN applies, convey the TTN in the N903 to associate the TCN, TTN, and container number all together in a single N9 segment."	
ITEM 4: REASON FOR CHANGE (business case)		
Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.		
This is a reworked submission of changes requested in DM 906. This change is required to enable systems compliance with direction from Joint Requirements Oversight Council Memorandum direction to implement TTAN and TTN and additional TTN Program Management Office guidance. IBS will pass the TTN to carrier systems via the 300A so that it will be available for carrier status reporting via the 315A.		
This DM provides a conditional technical capability to add the TTN to the booking request, but does not contain the functional requirement to include it. The functional requirement to include the TTN in the booking request is between SDDC and the TTN Program Manager. Request SDDC approve this DM unless they can provide technical reasons for not approving it...Thanks...JGW		
ITEM 5: PRIORITY/REQUIRED DATE		
Identify priority and required date of change.		

PRIORITY: (R) - Routine

Required by date: 10/29/2010

ITEM 6: Reviewed by LMI.

Comments:

John,

Although I believe this is a less than optimal solution because it does not provide a qualifier code that identifies the TTN, discussions with Harry and his discussions with SDDC/IBS have convinced me that because the IC will only be used between IBS and the carriers, and IBS staff understand how to interpret the data that will be conveyed in the N9 segment, I recommend that you approve this DM for voting.

It does provide a functional solution to communicate the TTN to the ocean carriers, and does not violate either X12 or DoD rules.

Rgrds...Frank 22Sept10
