

APPENDIX UU

TYPE PACK CODES

Number of Characters:	Two
Type of Characters:	Alphanumeric
Data Location	
DD Form 1384:	Block 9 and Column 39
Automated Record:	rp 28–29
Responsible Agency:	Defense Transportation Regulation Administrator

A. GENERAL

1. The type pack code provides two kinds of information.
 - a. For breakbulk shipments, including those that subsequently may be loaded into a cargo container, it identifies the type of packing.
 - b. For cargo containers (SEAVANs), it identifies who loaded the cargo into the container and the capacity to which the container was loaded.
2. The most current version of the Type Pack Codes are available at the United States Transportation Command (USTRANSCOM) Reference Data Management System (TRDM) website at <https://trdmws.maf.ustranscom.mil/>— click on “DTR Data” and “Type Pack Codes,” and select “Display Data” from the Actions Legend box. They are accessible by all users, to include Department of Defense contractors and vendors, through the Defense Transportation Electronic Business website at <http://www.transcom.mil/cmd/associated/dteb/> by clicking on “Reference Data.”
