The ***Automatic Identification Technology (AIT) for Department of Defense (DoD) for Supply and Transportation Processes*** is **available only behind the USTRANSCOM firewall and thus has limited availability. You must have a USTRANSCOM web services account to access it.**

If you are operating from a **ustranscom.mil address**, you automatically have access to USTRANSCOM AIT/ITV web page and you may access the AIT web page at https://www.ustranscom.mil/cmd/associated/ait/index.cfm.

If you are operating from a **dot.mil address other than ustranscom.mil**, you may access the AIT web page at https://www.ustranscom.mil/cmd/associated/ait/index.cfm.

If you are a **contractor supporting the government with a common access card (CAC)** you may access the AIT web page at https://www.ustranscom.mil/cmd/associated/ait/index.cfm.

Those without a dot.mil address or CAC, and with a creditable reason for access to the AIT Framework, may request that a copy be e-mailed to them. E-mail the request to USTRANSCOM's J4-LT AIT/ITV Implementation Branch at: transcom.scott.tcj5j4.mbx.lt@mail.mil
