DTEB DATA MAINTENANCE WORK REQUEST FORM

DATE SUBMITTED: 03/12/2012
DM NUMBER: 1042

USE THIS FORM TO REQUEST A NEW OR A CHANGE TO AN EXISTING DoD EDI CONVENTION OR ASC X12 STANDARD.

Complete all required actions. Numbered attachments may be used for continuation.

ITEM 1: SUBMITTER INFORMATION

If the submitter information below is incorrect contact:

Mr. David (Dave) Jimenez, USTC-DTEBAccount@ustranscom.mil, DSN 770-3896, Comm (618) 220-3896 to update.

NAME: Mr. Craig R. Matlock
ORGANIZATION: HQ AMC/A4TI
Application Systems Affected: All,

EMail ADDRESS: craig.matlock@scott.af.mil
PHONE (DSN) 779-7940
PHONE (COMMERCIAL) (618) 229-7940

ITEM 2: REFERENCES

Identify either the DoD EDI convention or ASC X12 standard requiring change. If a new convention or standard is required, type "NEW" in place of the title.

Type: DoD EDI (C)onvention
TITLE: DTEB 858.B.004010 TRANSPORTATION CONTROL AND MOVEMENT DOCUMENT (TCMD) VERSION 2

ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Add
Description:

Add new NTE segment at index 167 in data group 9013 as conditional with segment name "NTE SEGMENT - Passive RFID Tag Serial Number" with a segment condition note that reads: "SEGMENT CONDITION: Use to indicate the serial number of the Passive RFID tag attached to the shipment unit." Add new data element 363 at index 167-01 as mandatory, ID, 3/3 with element name "Passive RFID Tag Serial Number Qualifier". Add code value "PID - Property Improvement Description" with usage note that reads: "Use 'PID' to denote Passive RFID Tag Serial Number." Add new data element 352 at index 167-02 as mandatory, AN, 1/32 and element description that reads: "Enter the Passive RFID tag serial number used for in transit visibility tracking of the tag."

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

Currently the 858B IC has the aRFID tag which is required for DLA built pallets that are sent to an AMC aerial port for onward movement. Incorporating the pRFID tag in the 858B IC would allow transportation systems to utilize the ATCMD and the pRFID tag data for loose shipment units destined for onward movement.

ITEM 5: PRIORITY/REQUIRED DATE

Identify priority and required date of change.

PRIORITY: (R) - Routine

Required by date: 04/10/2012

Administration change only. No DTEB vote required for approval.

Vote required.

ITEM 6: Reviewed

REVIEW ACTION: TRANSCOM Review

Comments:

Recommend release for member vote, 13-Mar-12 PGV

ITEM 7: Reviewed by TRANSCOM.

APPROVAL ACTION: Approved

Comments:

ITEM 8: Ask for an additional reviewer's inputs.

Don't ask an SME to review this DM.

Comments:

ITEM 9: Voting.

Voting Action:

Released for Voting

Due Date:

03/30/2012

Voting Comments:

Released for vote. -CD 3/13/2012

ITEM 10: Final Approval.

Approval Action:

Approved

Final Approval Comments:

Approved by vote. --CD 4/2/2012

ADDITIONAL DTEB DATA MAINTENANCE WORK REQUEST INFORMATION

DATE SUBMITTED: 03/12/2012

DM NUMBER: 1042

ITEM 1: DEVELOPMENT HISTORY

03/13/2012 12:36:18 Mr. Gordon J. Fitzpatrick - USAF/CMOS - Approve : implementation Date is unknow, but we expect it to happen in 2014. We expect this to be in version 3, not 1 or 2.

03/23/2012 12:25:42 Ms. Heidi M. Daverede - DLMSO - Approve - with comments : If you want to have consistency with how you've handled identification of passive and active RFID tags in a single segment instance (e.g., 856A), then you may want to consider doing the following. 1) At index 166: Change the description (name) of the (existing) NTE segment to "RFID Tag Serial Number"; and Change the SEGMENT CONDITION to read: SEGMENT CONDITION: "Use to indicate the tag serial number when an RFID tag is attached." 2) At index 166-01: Change the description (name) of the element to: "RFID Tag Serial Number Qualifier"; Add a new qualifier code, "PID Property Improvement Description", (do not change or delete the existing code or description at this index) with DoD attributes: Mandatory, ID 3/3; and Add the corresponding User note: "Use 'PID' to denote passive RFID tag serial number." 3) At Index 166-02: Change the description (name) of the element to: "RFID Tag Serial Number", and Change the user note to say: "Enter the RFID tag serial number used for in-transit visibility tracking of the tag."

03/29/2012 16:19:55 Ms. Pamela (Pam) J. Kroehler - USN/FACTS - Approve :

03/30/2012 15:02:20 Mr. Gregory (Greg) P. Doyle - SDDC - Abstain (no impact) :
