VERSION 2

ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Change

Description:

Change the user note at index 89-02 (LQ02) Due-In Notice Type Pack Code to say:

"Enter DoD unique Due-In Type Pack Code of material. Valid code values may be found in the TRDM table TYPE\_PACK, mirrored at [https://www.transcom.mil/dteb/V\\_TYPE\\_PACK.htm](https://www.transcom.mil/dteb/V_TYPE_PACK.htm)

If consolidated pack enter value 'CP'.

If more than one Type Pack Code in the shipment unit enter value 'MX'.

[CDP 24/25]"

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

This NVR DM is submitted as an updated version of DM 857 which was approved as NVR, but never implemented. Below is the original (DM 857) reason for change:

This revision clarifies the intention that DoD codes should be passed in the LM loop. The LM segment/loop condition a states that DoD unique codes will be passed within this loop. At Index 68-02, (1) the fact that this element is an AN (not datatype and (2) that the X12 data element number 1271 conveys an industry code (not an X12 code) indicates that this should not convey an X12 code. Recommend this change be approved as an NVR DM -- it does not make any substantive change to the existing IC, only the usage already intended.

ITEM 5: PRIORITY/REQUIRED DATE

Identify priority and required date of change.
