Type

DoD EDI (C)onvention

TITLE:

DTEB 858.R.004010 FREIGHT BILL OF LADING INFORMATION VERSION 2

## ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Delete

Description:

At indices 117-09 and 117-10, L009 - Type Pack Qualifier and L010 - Type Pack Sub Qualifier, remove the 'Sample Values' leaving only the reference to Section 6.

## ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

The sample values are incorrectly applied at index 117-10 and their inclusion at both indices has caused confusion with the implementation of these elements. The complete correct code list is reflected in the referenced section 6 material.
