ITEM 2: REFERENCES

Identify either the DoD EDI convention or ASC X12 standard requiring change. If a new convention or standard is required, type "NEW" in place of the title.

Type

DoD EDI (C)onvention

TITLE:

DTEB 315.A.004010 STATUS DETAILS
(OCEAN) VERSION 4

ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Add

Description:

At index 5-02 in the R402, DE309 - Location Qualifier, add code "IM" - Military Standard Movement Procedures (MILSTAMP). Update the current element usage note to state that MILSTAMP is also known as DOD Water Port Codes. Update the current element usage note stating the source of the DOD Water Port Codes is TRDM. Update the current element usage note stating DOD prefers the DOD Water Port Codes be sent vs. the Schedule D or K Census codes.

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

There are disconnects between the Schedule D/K Census and DOD Water Port Codes. The census codes are not as granular as the Water Port Codes used by the DOD. There are also examples of missing codes for ports the DOD uses. Adding the option to send the DOD Water Port Codes would help resolve booking/payment issues with the carriers. It would also Alleviate the need to employ complicated translations, which are at best a guess. This change will not only benefit the ocean booking/payment process, but also the ITV provided by the 315A which many systems utilize.
