For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Add

Description:

Add K1 segment to the header level of the 304A transaction with the max of 12 uses that X12 allows. Within the K1 segment provide both the K101 and K102 with the attributes of 1/30 for each of them (also what X12 allows). Add usage note that reads "Used to provide carrier specific instructions/notes".

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention.
