For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Add

Description:

At Section 3 Ref H301 Data Element 152 and Section 6.0 Application Code Lists for index 15-01 Special Handling Code add the following X12 approved codes with DOD definitions:

Code == X12 Definition == DoD Definition

APD -- X12 defines as "Additional Copy of Shipping Papers for Proof of Delivery" -- Use 'APD' to denote Scanning'

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

Currently there are no actual exchanges using these codes for the EDI 300A. These codes with the DOD definitions will allow users to support functional requirements in support of the USC8 contract. Scanning is to describe the action of scanning the cargo as it relates to security procedures. This accessorial, also has a price scheme associated with it.
