Type DoD EDI (C)onvention	TITLE: DTEB 315.A.004010 STATUS DETAILS (OCEAN) VERSION 10	
ITEM 3: PROPOSED WORK		
Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.		
ACTION: Change	Description:	
In the R406, DE 174, at Index 5-06, change the Terminal Name implementation note to read: "This data element is used to represent the cargo pick up or Consignee DODACC and not the Terminal Name. When R401 equals 'R', enter the DODAAC for the cargo pick up location. When R401 equals 'M', enter the Consignee DODAAC. Add new element condition note that reads: "ELEMENT CONDITION: MANDATORY when R401 contains code value 'M.' "		
ITEM 4: REASON FOR CHANGE (business case)		
Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.		

This DM removes Code 'O' for Origin (Operational), which aligns with DM 1238, which removes unnecessary codes. It also clarifies the use of the R401.
