## ITEM 2: REFERENCES

Identify either the DoD EDI convention or ASC X12 standard requiring change. If a new convention or standard is required, type "NEW" in place of the title.

Type

DoD EDI (C)onvention

TITLE:

DTEB 214.A.004010 MOTOR CARRIER SHIPMENT STATUS VERSION 4

## ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Add

Description:

In the L11 segment at index 21 change the segment condition note to read: "SEGMENT CONDITION: Carriers are encouraged to provide either status location, SPLC, Aerial Port, or postal code data where available. This segment may occur once per shipment status event (LX Loop)."

In the L1101, DE127, at index 21-01 change DOD implementation note to read: "SPLC, Aerial Port, or Postal Code (DG110)"

In the L1102, DE128, at index 21-02 add the following X12 codes and DOD implementation notes: Code value '4L - Location-specific Services Reference Number', DOD implementation note: "Use '4L' to denote International Civil Aviation Organization (ICAO) code of the location reported in the MS101 for events occurring at an airport"

Code value 'ZZ – Mutually Defined', DOD implementation note: "Use 'ZZ' to denote International

Air Transport Association (IATA) code of the location reported in the MS101 for events occurring at an airport"

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

City name is not very useful for identifying a location for a transportation event. For example, a carrier reporting a 214A event at "New York" leaves the IGC user with inadequate location information to determine ITV. When an air carrier is reporting an event at an airport, it is very likely that they know the airport code that the event is occurring at. That information would be preferred over a city name by IGC.
