ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Add

Description:

In the LH101, DE355, change the DOD implementation note to read: "Code specifying the units in which a value is being expressed, or manner in which a measurement has been taken. Contains the code identifying the Unit of Measure (type of packaging) for which the data in LH102 is reported. See Section 6 for a list of the LH101 supported codes (cross referenced from Type Pack Code passed in the LCT02, DE211)." Use LH106 to express weight and volume for non-bulk shipments. Refer to the X12 Standard, DE355 for applicable codes. Remove the statement that reads: "If a particular element contains several valid values found in multiple tables within section six of an IC, the following entry would be made. Common code values associated with multiple definitions prevents documentation of the entire sub-set."

In the LH106, DE355, remove all listed code values and change the DOD implementation note to read: "Use the unit of measure codes for quantity or volume of non-bulk shipments. This will typically be pounds, cubic feet, or a unit of measure other than pieces. Refer to the X12 Standard, DE355 for applicable codes. Use LH101 to express type of packaging. ELEMENT CONDITION: Required if LH107 is used."

In Section 6, table for Type Pack Code and HAZMAT - Unit of Measure Code, correct indices in the table title and the column for LH101 Values to match the applicable index in sections 3 & 4.

ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

The code list currently found in the LH106 applies to the LH101 and should not be present in the LH106. The LH106 is used to pass the qualifier for UOM of non-bulk HAZMAT shipments but the code set currently listed is for type of packaging that is passed in the LH101. Additionally, information in Section 6 of the IC does not refer to the correct indices for the applicable listing of codes.
