<b>ITEM 3: PROPOSED WORK</b>

For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.		
ACTION: Change	Description:	
In Section 4 at Index [175-04] Service Charge - L104 DE 58 - The DoD Recommended Attribute Min/Max needs to be increased from "1/8" to "1/10". In Section 4 at Index [192-04] Not Lowest Cost Charge Difference - L104 DE 58 - The DoD Recommended Attribute Min/Max needs to be increased from "1/8" to "1/12".		
<b>ITEM 4: REASON FOR CHANGE (business case)</b>		
Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.		
The shipment costs associated with certain lanes for high value loads (Commercial Air Freight) can now exceed \$10M. This presents the possibility of exceeding the current DoD Recommended size limit for the Not Lowest Cost Charge Difference if the lowest cost carrier is not selected. In these cases, the GFM user would not have the capability to process high value/critical shipments. GFM and CMOS teams have also recommended a similar change for Service Charge.
