## ITEM 2: REFERENCES

Identify either the DoD EDI convention or ASC X12 standard requiring change. If a new convention or standard is required, type "NEW" in place of the title.

Type DoD EDI (C)onvention	TITLE: DTEB 858.B.004010 TRANSPORTATION CONTROL AND MOVEMENT DOCUMENT (TCMD) VERSION 6
------------------------------	---

## ITEM 3: PROPOSED WORK

Identify the action required (add, change, delete) and describe the specific work requested to the convention of standard. For convention work, identify section, page number, affected item, and any other information that clarifies the request. For standard work, identify segment, segment position, segment attribute, data element, data element attribute, and any other information that clarifies the request. Acronyms/abbreviations must be spelled out. New codes must include an expanded code definition.

ACTION: Add	Description:
In Section 6.0 [14-02]-Mode/Method to POD Code code list for BX02 DE 91 add the following codes: X12 Code DOD Definition SF Surface Freight Forwarder LD Local Delivery	

## ITEM 4: REASON FOR CHANGE (business case)

Explain why you need the proposed change. Provide a complete scenario that tells what the business function, operation, or problem is that will be satisfied by a change to the convention. Technical assessment requires enough information to be able to propose an alternate solution, if necessary. Be specific. Use additional paper if necessary.

The 858R IC allows the mode/method codes of Surface Freight Forwarder (SF) and Local Delivery (LD) in the list of codes for the BX02 to move cargo. The 858B ATCMD IC does not include those modes in the BX02 for the mode/method to the APOE. 858B ATCMD submissions currently get rejected with these mode/method codes even though the 858R allows them as valid modes for movement. Adding these mode/method codes to the 858B brings the 858B in line with what is allowed in the 858R and will prevent 858B ATCMD submissions from being rejected if they cite those codes.

## ITEM 5: PRIORITY/REQUIRED DATE
