

USTRANSCOM Science and Technology

JDDE Mission Assurance Coordinator

Project Summary: The objective of this research and development effort is to enable Joint Deployment and Distribution Enterprise (JDDE)-coordinated risk-informed options and recommended risk decisions to the USTRANSCOM Commander in the role as the Joint Deployment and Distribution Coordinator (JDDC), while providing increased decision space to evaluate them. This effort will investigate how required integration and coordination of mission assurance information and activities can be achieved throughout USTRANSCOM, its components, and its partners.

Concentric Circles of Operational Spaces with Identified Threat Hazards

Benefit:

Increased strategic flexibility through increased plan quality & development efficiency, increased product consistency, and decreased cognitive load for decision makers

Duration of project: FY23 – FY25

Participants: Air Force Research Lab

Project advocacy (funding or otherwise): USTRANSCOM J3
