

CYBER SECURITY & INFORMATION TECHNOLOGY

**ENSURING THE CAPABILITIES TO OPERATE IN CYBERSPACE DOMAIN
AND PROVIDE ACCESSIBLE, AVAILABLE, RELIABLE SECURE DATA,
AND INFORMATION FOR USTRANSCOM DECISION MAKERS**

Together, we deliver.

The Air Force defends our nation's interests against enemies of all kinds, and in the 21st century one of the most highly contested arenas is the digital world. USTRANSCOM employs highly trained specialists to help maintain and advance Air Force leadership and protection of cyberspace.

Our Cyber and IT teams support complex, specialized hardware and software systems around the country and around the globe, guarding vital intelligence while keeping our data safe and flowing freely.

Our IT and cyber systems are some of the most complex in the world and require the best and brightest thinkers and creative minds to help Air Force stay ahead of the threat. USTRANSCOM computer engineers, network specialists, data managers, security specialists, and cybersecurity pros are on the front lines every day in the ongoing battle to keep our systems, infrastructure, and digital information secure.

Looking for a chance to make a difference? Look no further! We invite you to consider the rewarding and challenging career opportunity of serving as a Command, Control, Communications and Cyber Systems civilian with the United States Air Force at US Transportation Command.

WORK ROLES:

Computer Scientist
Computer Engineer
IT Specialist
Enterprise Architect
