USTRANSCOM projects and sustains military power globally in order to assure our friends and allies, deter potential adversaries, and if necessary, respond to win decisively. The key to conducting globally-integrated mobility operations is the dynamic synchronization of transportation networks that allows us to allocate scarce mobility resources in support of the Secretary of Defense's highest priorities, whether foreign or domestic.

USTRANSCOM is a global Unified Combatant Command with five specified Unified Command Plan missions.

The command is:

- (1) the single manager for coordinating military and commercial air, land and sea transportation and air refueling support;
- (2) arranging transportation for nations ill and injured;
- (3) providing the joint sourcing solutions for mobility forces;
- (4) providing alert postured capabilities to accelerate formation of joint force; and
- (5) overseeing the effectiveness of the delivery of assets from fort/factory to point of need.
