Enterprise Architecture, Data, and Engineering (EADE)

NAICS: 541512

Description: The scope of the architecture, data management, and engineering services includes the operational and system perspectives of Command and Control (C2), planning, transportation, logistics, and business support system domains. Informed by strategic vision documentation, the contractor will provide architecture, data management, and engineering support. Additionally, this contract will support prototyping, information support plan development, software development, and system administration that allows EA data to reside in one integrated architecture tool suite identified in paragraph 6. This PWS procures an integrated enterprise architecture from the enterprise level through the solution level and across architectures. Integration is achieved through an architecture tool suite, the use of standardized templates and guidelines, training, and the architecture review process. The work effort will support engineering and analytical services required to support and implement USTRANSCOM, and its TCCs operational and system requirement(s) solutions. The contractor shall possess a comprehensive understanding of the DOD Architecture Framework (DODAF), the Federal Enterprise Architecture Framework (FEAF), and the relationships/dependencies between architecture models to support assigned projects. This allows Government personnel to conduct impact analysis on the enterprise, systems of systems, and individual system levels.
