

APPENDIX BB

AIR DIMENSION CODES

The air dimension code is used for all air shipments. The code indicates whether shipments have one or more outsized dimensions (greater than 84 inches) and/or are consolidations (shipments of multiple requisitions). The most current air dimension codes are available on the United States Transportation Command (USTRANSCOM) Reference Data Management website at <https://trdmws.maf.ustranscom.mil/>—click on “DTR Data” and “Air Dimension Code”, and select “Display Data” from the Action Legends box. They are accessible by all users, to include Department of Defense contractors and vendors, through the Defense Transportation Electronic Business website at <https://www.ustranscom.mil/cmd/associated/dteb/> by clicking on “Reference Data.”
