

APPENDIX EE

ESTIMATED TIME OF ARRIVAL (ETA) CODES

The ETA code is used by shippers to indicate the number of days a shipment will be in transit from the consignor to a port of embarkation (POE). Using the ETA code and the date shipped code, the POE is able to determine when the shipment will arrive. The most current ETA codes are available on the USTRANSCOM Reference Data Management System website at <https://trdmws.maf.ustranscom.mil/>—click on “DTR Data” and “Estimated Time of Arrival Domain”, and select “Display Data” from the Action Legends box. They are accessible by all users, to include Department of Defense contractors and vendors, through the Defense Transportation Electronic Business website at <https://www.ustranscom.mil/cmd/associated/dteb/> by clicking on “Reference Data” and “Estimated Time Of Arrival Code”.
