

ATTACHMENT V7

SECURITY COOPERATION PROGRAM (SCP) SHIPMENT TRANSPORTATION ACCOUNT CODES (TAC)

A. PURPOSE

This attachment provides definitions, instructions, and other information pertaining to the assignment of TACs to Department of Defense (DoD)-sponsored shipments of SCP material. The SCP encompasses Foreign Military Sales (FMS) and Building Partner Capacity Programs. Details of the SCP are set forth in DSCA 5105.38-M, Security Assistance Management Manual (SAMM), and this Regulation Appendix E.

B. GENERAL INFORMATION

1. The alphabetic characters listed in [Table V7-1](#) will be used for compiling FMS and Building Partner Capacity Programs TACs, and will identify the Sponsoring Service. The second, third, and fourth positions can be either numeric or alphabetic.
2. References:
 - a. DSCA 5105.38-M, Security Assistance Management Manual (SAMM).
 - b. DLM 4000.25-1, Military Standard Requisitioning and Issuing Procedures (MILSTRIP).
 - c. DLM 4000.25-2, Military Standard Transaction Reporting and Accounting Procedures (MILSTRAP).
3. Definitions:
 - a. FMS. That portion of the United States (U.S.) SCP authorized by the Foreign Assistance Act of 1961, as amended, and the Arms Export Control Act of 1976, as amended, which furnishes defense articles and defense services to foreign governments and international organizations on a reimbursable basis. Sales are conducted on the basis of formal contracts or agreements between these governments and organizations and the U.S. Government. The sales are government-to-government and may be furnished from DoD stocks or through DoD-managed contracts. DoD, not the vendor, is the seller; therefore, all contracts will be written as Free-on-Board Origin so that a DoD Contract Administrator can accept material at origin and process shipments In Accordance With (IAW) DoD regulations. Funding for this program may be by cash, credit, non-repayable credit or grant. Shipments are processed under FMS procedures, regardless of the type of funding.
 - b. Building Partner Capacity Programs. That portion of the U.S. SCP authorized by the Foreign Assistance Act of 1961 as amended, which provides defense articles and services to recipients on a non-reimbursable (grant) basis. Building Partner Capacity Programs are sometimes used for special operations, such as for the United Nations. In these instances, the U.S. Service and its command(s) will furnish full instructions and billing addresses, which are directing the operation. Building Partner Capacity Programs also include, but are not limited to, International Military Education and Training (IMET), Excess Defense Articles (EDA) and Presidential Determinations (PD). Below is a more detailed explanation of each program.
 - (1) IMET. Formal or informal instruction provided to foreign military students, units, and forces on a nonreimbursable grant basis by officers or employees of the United States, contract technicians, and contractors. Instruction may include

correspondence courses; technical, educational, or informational publications; and media of all kinds. IMET is identified by inventory control point, Type of Assistance Code “1” in the fourth position of Building Partner Capacity TACs and in the sixth position of IMET MILSTRIP requisitions and Transportation Control Numbers (TCN) used to requisition and move any material involved.

- (2) EDA. EDA material is applied collectively to U.S. defense articles that are no longer needed by the U.S. armed forces. Such defense articles may be made available for sale as FMS cases or as grant transfers to eligible countries. EDA items must be drawn from existing DoD stocks. When Building Partner Capacity procedures are followed, an A will appear in the fourth position of the TAC and in the sixth position of MILSTRIP requisitions and TCNs used to requisition and move the material.
 - (3) PD. Emergency situations not covered by any other SCP that require immediate military assistance to a foreign country or international organization. Section 506 of the Foreign Assistance Act authorizes emergency draw downs for these situations. The PD provides neither funds nor contracts authority. Therefore, it only authorizes drawdown of current DoD stocks and the use of non-contractual services (e.g., Air Mobility Command airlift or Military Surface Deployment and Distribution Command-arranged ocean lift, and training from DoD resources). The PD also has a fixed dollar ceiling and a predetermined duration (usually 120 days). PDs are identified by Type Assistance Code “C” in the fourth position of Building Partner Capacity TAC and the sixth position of the MILSTRIP requisitions and TCNs used to requisition and move the material involved.
 - c. Case Designator. A unique designator assigned by the Implementing Agency to each FMS/ Building Partner Capacity case. The designator originates with the offer of a sale, identifies the case through all subsequent transactions, and is generally a three-letter designator.
 4. FMS/ Building Partner Capacity TAC Coordination/Assistance. The TAC focal points of contact, [Table V7-2](#), will provide assistance in unusual TAC assignment problems that cannot otherwise be resolved through research and use of this regulation.
 5. Appropriations Chargeable. Inland Continental United States (CONUS) transportation charges for FMS shipments may be processed in one of the following ways:
 - a. Collect – No Bill of Lading (BL). Applies to Delivery Term Code (DTC) 4 (non-Defense Working Capital Fund (DWCF) funded) and DTC E FMS Shipments. Supply depots will release material under this DTC following normal MILSTRIP release procedures. Based on a DD Form 250, [Materiel Inspection and Receiving Report](#), [Figure V7-1](#) that documents acceptance of material by the U.S. Government at the vendor’s facility, a DoD Contract Administrator’s Transportation Office (TO) will also process a DTC 4 shipment IAW MILSTRIP release procedures. The vendor will be instructed to ship material to a CONUS-located customer country freight forwarder on a Collect Commercial Bill of Lading (CCBL). Regardless of the source of material, the releasing TO will sign the “No Recourse” Clause on the face of the CCBL IAW this regulation. A DTC of 4 will not be assigned to any requisition/material release order for DWCF material. However, if this does happen, the material will be shipped pre-paid as DTC 5 citing the DWCF for inland CONUS transportation.
- NOTE:** Prepay and Add procedures apply if DTC 4 shipment is a small parcel. Shipment will be handled as DTC 5 using FMS Transportation funds. Shippers are responsible for advising the material item manager. The materiel management agency is responsible for

initiating billing adjustments with the Defense Finance and Accounting Service-Indianapolis.

- b. Shipment under the FMS Trust Fund Transportation Cost Clearing Account (L009 Account) can apply to all of the following DTCs: 2, 5, 7, 9, or 8. However, for the numeric DTCs, it will apply only if the items involved are not DWCF material. Inland CONUS transportation of DWCF material will be funded by the DWCF. Supply depots will follow normal MILSTRIP release procedures when shipping material under the FMS Cost Clearing Account. Based on DD Forms 250 that document acceptance of material by the U.S. Government at vendors' facilities, DoD Contract Administrator TOs must also determine whether the FMS Transportation Cost Clearing Account or a DWCF applies to inland CONUS transportation. They will then process shipments following the same MILSTRIP release procedures. According to the DTC, material will be shipped to a customer country's CONUS-located freight forwarder (DTC 5), to a DoD CONUS Seaport of Embarkation (SPOE) or Aerial Port of Embarkation (APOE) (DTC 7, 8, or 9), or to a CONUS staging area or other DoD activity (DTC 2). Freight shipments will be under a BL or a DoD-approved prepaid commercial BL citing the FMS Trust Fund Transportation Cost Clearing Account (see below).
 - c. Shipment under DWCF Transportation Funds can apply to DTCs 2, 5, 7, 8, and 9. DWCF material currently includes inland CONUS transportation in the selling price of the material. DWCF FMS shipments will terminate at a CONUS-located customer country freight forwarder (DTC 5), a DoD CONUS SPOE or APOE (DTC 7, 8 and 9), or a CONUS staging point or other DoD activity (DTC 2). Although DTC 4 will never apply to a DWCF item, some requisitions for this material may erroneously bypass requisitioning edit checks with DTC 4 in them. Shipping activities will process these as DTC 5 shipments citing the DWCF for inland CONUS transportation.
 - d. FMS Assembly Actions. At times, a material management command must bring several parts, subassemblies, and Government Furnished Material (GFM) together to produce an end item requisitioned under the FMS program. Whenever this is done, the parts, subassemblies and GFM is shipped under a command's own requisition number or other FMS tracking number to the assembly location of the end item. The transportation charges for the movement of assembly items will be paid from the FMS case. The accounting classifications shown in [Table V7-4](#), [Table V7-5](#), and [Table V7-6](#) depict the format used by the IAs for these shipments. After the end item is completely assembled, it is normally shipped to the final destination under a FMS Document Number IAW the delivery term code from the Letter of Offer and Acceptance (FMS Case).
6. Decision Table: Identifying FMS Requisitions/TCNs versus Building Partner Capacity Requisitions/TCNs.
- a. FMS. FMS requisitions always contain a DTC in record position (rp) 34. The DTC will either be a 2, 4, 5, 7, 8, or 9 for outbound sales shipments or an C, E, F, G, H, or J for Repair and Return/Maintenance Support Agreement two-way shipments. Explanations of these DTCs are found in Appendix E of this regulation. The fifth position of an FMS shipment's TCN corresponds to rp 34 of an FMS requisition.
 - b. Building Partner Capacity requisitions must move through the Defense Transportation System (DTS). These requisitions will contain either DTC 7 or 9 in rp 34. The fifth position of a Pseudo- FMS shipment's TCN corresponds to rp 34 of a Building Partner Capacity requisition.
 - c. [Table V7-7](#) is a guide to locating the different FMS or Building Partner Capacity data elements in SCP shipping documents and TCNs.

NOTE: DD Form 1348-1A, Issue Release/Receipt Document, [Figure V7-2](#), is the shipping document used by DoD and General Service Administration storage activities, and it contains the 80 rp format. DD Form 250 is the shipping document used for items procured for FMS customers and shipped by DoD Contract Administration activities. It does not have an 80 rp format and DTCs for requisitions are located in the same positions as in TCNs.

7. SCP (FMS and Building Partner Capacity) TAC Construction.
 - a. FMS. [Table V7-8](#) depicts construction of FMS TACs.
 - b. Building Partner Capacity. [Table V7-10](#) provides criteria to follow in developing Building Partner Capacity TACs.
8. Retrograde of FMS Cargo (Supply Discrepancy Report (SDR) Returns).
 - a. SDR Return TACs will be constructed with “III” entered in the 2rd, 3rd, and 4th, positions. The first position will contain the U.S. Service Code of the U.S. Service directing the return. The possible SDR Return TACs are as follows:

U.S. Army: BIII	U.S. Air Force: DIII
U.S. Navy: PIII	U.S. Marine: KIII
U.S. DLA: RIII	
 - b. See Appendix E, Par. G for billing and payment process for SDR return transportation.
9. Billing Information. Transportation costs for FMS/Building Partner Capacity material will be billed via electronic means to:

Defense Finance and Accounting Service,
Attention: 116-E, 8899 E. 56th Street,
Indianapolis, IN 46249

 - a. Building Partner Capacity Procedure Shipments. Billing will be IAW the Building Partner Capacity type program that is being processed. Normally, billing instructions will be furnished by the sponsoring U.S. Service or subordinate command involved.

MATERIAL INSPECTION AND RECEIVING REPORT						Form Approved OMB No. 0704-0248		
<p><small>The public reporting burden for this collection of information is estimated to average 30 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing the burden, to Department of Defense, Washington Headquarters Services, Directorate for Information Operations and Reports (0704-0248), 1215 Jefferson Davis Highway, Suite 1204, Arlington, VA 22202-4302. Respondents should be aware that notwithstanding any other provision of law, no person shall be subject to any penalty for failing to comply with a collection of information if it does not display a currently valid OMB control number.</small></p> <p style="text-align: center;">PLEASE DO NOT RETURN YOUR COMPLETED FORM TO THE ABOVE ADDRESS.
